El secreto mejor guardado de la T.I.A.

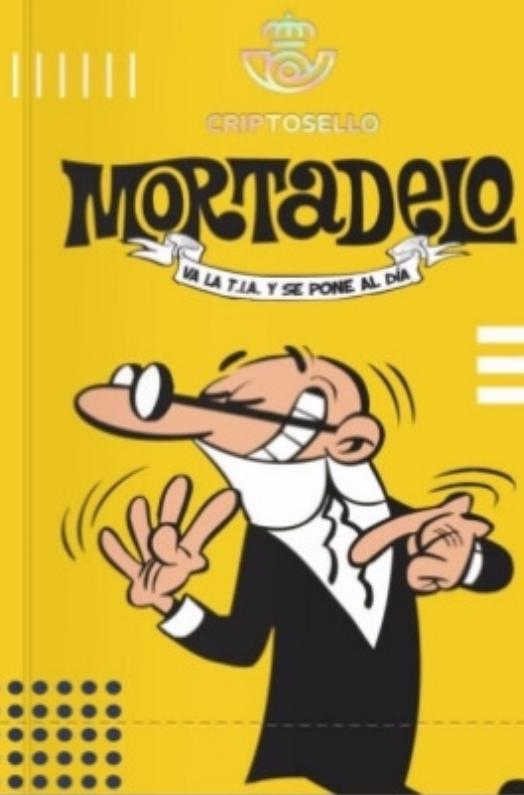

Un **CRPTOSELLO** es la evolución del coleccionismo filatélico tradicional. Cada uno de ellos se compone de un **TUSELLO** físico y un gemelo digital en blockchain.

Hey! Did you know that **Correos' CRPTOSELLOS** are like a modern version of stamp collecting?

Each one has a **digital twin on the blockchain**. **There are 5 different twins**, and some are more common than others.

To find out which digital twin you've been given, all you have to do is scan the QR code or visit www.criptosello.correos.es

You can transfer your twin to a **digital wallet**. You just need your **wallet address** and the **transfer code**, which is hidden under the protective band.

Just remove it and scan the QR code or enter the code at www.criptosello.correos.es

The security code is key, as it provides anyone with it access to the digital twin transfer.
